

## Unique brewers' yeast fibre products

Leiber YeaFi® is a unique combination of inactive brewers' yeast with high-fibre roughage and functional fibres that are essential for a proper diet. Brewers' yeast is rich in bioavailable active ingredients and nutrients, such as proteins, amino acids, B vitamins, minerals and trace elements.

The highly digestible fibre components perfectly enhance the positive nutritional and physiological properties of brewers' yeast. Brewers' yeast and functional fibres from secondary food streams are not only in line with today's sustainability trend, but they also provide many dietary and postbiotic benefits!

Leiber YeaFi® has been produced without any changes to the original recipe since 1954. Our winning formula for healthy and sustainable horse nutrition!

### Application:

- | in high-concentrate rations
- | for all breeds and types, for all performance areas

### Leiber YeaFi® product benefits:

	optimised body condition score (BCS)
	digestion support
	improved shiny coat and shedding
	supports fertility and reproduction
	long-term promotion of hoof quality
	easy handling, dosage and storage

**Leiber**  
Excellence in Yeast

## 40% brewers' yeast (*Saccharomyces cerevisiae*) bound to 60% brewers' grains

Brewers' yeast and brewers' grains are produced in breweries under strict food guidelines. At Leiber, it is refined and inactivated using state-of-the-art processes. The unique production process preserves the essential ingredients of the brewers' yeast, such as proteins, B vitamins, trace elements and amino acids. At the same time, the brewers' yeast is deprived of its hygroscopic properties, which improves the taste and makes it easier to store the product.

Brewers' grains are particularly notable for their high content of crude fibre, crude fat and crude protein. Moreover, it is rich in various non-starch polysaccharides such as hemicelluloses, which serve as a nutrient substrate for the large intestine microbiome.

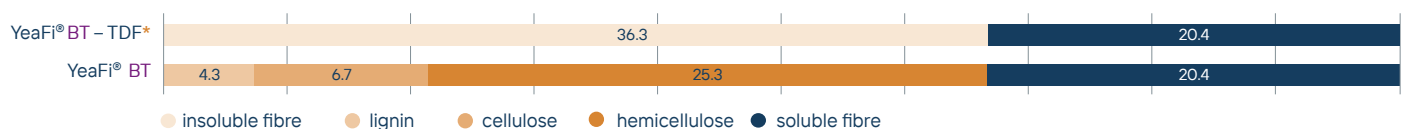

### Product properties

Structure:	free-flowing product
Colour:	light to medium brown
Smell:	typical of brewers' yeast
Bulk weight:	560kg/m <sup>3</sup>

Leiber YeaFi<sup>®</sup> BT is suitable for all horses and ponies, esp. for:

- | older horses and ponies (seniors)
- | riding and sport horses during training
- | breeding and rearing horses

### Fibre analysis (%) Leiber YeaFi<sup>®</sup> BT

\* TDF = total detergent fibre, dietary fibres

### Nutrient content in %

Crude protein:	31.0
Crude fat:	7.0
Crude fibre:	9.5
Crude ash:	5.5
Lysine:	1.3
Methionine:	0.6
Sodium:	0.1
Sugar:	1.0
Starch:	5.0
NfE:	41.0
ME (MJ/kg DM):	11.72

### Feeding recommendation per animal per day

Horse (600kg):	150g
Pony (350kg):	80g
Horse (600kg) in acute stress situations, advanced pregnancy or lactation:	200g
Rearing:	40–80g

### Note for sport horses:

Compliant with Anti-Doping and Medication Control Rules (ADMR) regarding the maximum amount according to FN ([www.pferd-aktuell.de](http://www.pferd-aktuell.de)) of max. 350g per animal/day. Special regulations in international sport (FEI) must be observed!

Leiber YeaFi<sup>®</sup> BT is also available in a finely milled form. Leiber YeaFi<sup>®</sup> BTR is offered as a variant with unmolassed sugar beet pulp.
